SUBJECT INDEX

"A Matter of Perspective"

The WHI Report on calcium and vitamin D supplementation: good news, not bad news (July/August), 24

Aging Issues

Anti-aging strategies: science or hype? (May/June), 12

Cognitive decline in aging women and what they can do about it (November/December), 10

Calcium and Vitamin D Supplementation

The WHI Report on calcium and vitamin D supplementation: good news, not bad news [A Matter of Perspective] (July/August), 24

Cancer

Exercise and menopause: positive health effects (May/June), 19

Reconsidering postmenopausal estrogen therapy and breast cancer [From the Editor] (July/August), 4

Menopause-focused medicine: what it is and how it works (September/October), 10

Cardiovascular Disease

Exercise and menopause: positive health effects (May/June), 19

Menopause-focused medicine: what it is and how it works (September/October), 10

"Clinicians' Forum"

What are the two most important time-saving suggestions you have for the average gynecologist? (January/February), 27

What are the four most significant new things you have learned from the literature and from The North American Menopause Society meetings over the past several years? (March/April), 25

How have you changed your clinical practice since publication of data from the Women's Health Initiative (WHI)? Do you have any limits for prescribing hormones for vasomotor symptoms? Under what circumstances would you consider prescribing hormones long-term (ie, 5 years or longer)? Do you think there should be a patient age limit when it comes to prescribing hormones? (May/June), 26

Is there a place for continuous estrogen-only therapy in the symptomatic postmenopausal woman with an intact uterus? (July/August), 28

If the decision has been made to discontinue hormone therapy (HT), what is the best way to do so? Would you recommend tapering or going "cold turkey," and how would you take into account the patient's subsequent risk factors for osteoporosis, and related bladder and sexual problems? (September/October), 29

How do you manage the woman who is newly menopausal, suffering from disruptive vasomotor symptoms and night sweats, but suffered a severe deep vein thrombosis in her one and only pregnancy 20 years ago. What workup, therapy and follow-up would you suggest? (November/December), 26

Cognitive Decline

Cognitive decline in aging women and what they can do about it (November/December), 10

Depression

Exercise and menopause: positive health effects (May/June), 19

Diabetes

Exercise and menopause: positive health effects (May/June), 19

Exercise

Exercise and menopause: positive health effects (May/June), 19

Current best treatments for menopausal hot flashes (November/December), 20

Fertility

Fertility care for perimenopausal women (March/April), 10

"From the Editor"

Women's voices for change—a new voice for women and a new partner for NAMS (January/February), 8

The psychosocial and socioeconomic burden of menopausal vasomotor symptoms (March/April), 6

Low back pain: management dilemmas (May/June), 8

Reconsidering postmenopausal estrogen therapy and breast cancer (July/August), 4

Is evidence-based medicine a pipe dream? (September/October), 6

The dramatic growth of NAMS—and now The NAMS Foundation! (November/December), 6

Hormone Therapy (ET/EPT)

Osteopenia: sorting out the confusion (January/February), 10

What are the four most significant new things you have learned from the literature and from The North American Menopause Society meetings over the past several years? [Clinicians' Forum] (March/April), 25

How have you changed your clinical practice since publication of data from the Women's Health Initiative (WHI)? Do you have any limits for prescribing hormones for vasomotor symptoms? Under what circumstances would you consider prescribing hormones long-term (ie, 5 years or longer)? Do you think there should be a patient age limit when it comes to prescribing hormones? [Clinicians' Forum] (May/June), 26

Incorporating sexual medicine into clinical practice (July/August), 18

Is there a place for continuous estrogen-only therapy in the symptomatic postmenopausal woman with an intact uterus? [Clinicians' Forum] (July/August), 28

Reconsidering postmenopausal estrogen therapy and breast cancer [From the Editor] (July/August), 4

A Matter of Perspective: The WHI Report on calcium and vitamin D supplementation: good news, not bad news (July/August), 24

Patient Education/Counseling

Reconsidering postmenopausal estrogen therapy and breast cancer [From the Editor] (July/August), 4

The role of shared medical appointments for midlife women (July/August), 8

If the decision has been made to discontinue hormone therapy (HT), what is the best way to do so? Would you recommend tapering or going "cold turkey," and how would you take into account the patient's subsequent risk factors for osteoporosis, and related bladder and sexual problems? [Clinicians' Forum] (September/October), 29

Menopause-focused medicine: what it is and how it works (September/October), 10

Perimenopause

Fertility care for perimenopausal women (March/April), 10

Menopause-focused medicine: what it is and how it works (September/October), 10

Practice Issues

The psychosocial and socioeconomic burden of menopausal vasomotor symptoms [From the Editor] (March/April), 6

The role of shared medical appointments for midlife women (July/August), 8

Is evidence-based medicine a pipe dream? [From the Editor] (September/October), 6

Menopause-focused medicine: what it is and how it works (September/October), 10

Sexuality/Sexual Dysfunction

Position Statement, Part 2. The role of testosterone therapy in postmenopausal women: Position Statement of The North American Menopause Society (January/February), 18

Vulvodynia and menopause (March/April), 14

What are the four most significant new things you have learned from the literature and from The North American Menopause Society meetings over the past several years? [Clinicians' Forum] (March/April), 25

Incorporating sexual medicine into clinical practice (July/August), 18

If the decision has been made to discontinue hormone therapy (HT), what is the best way to do so? Would you recommend tapering or going "cold turkey,"

and how would you take into account the patient's subsequent risk factors for osteoporosis, and related bladder and sexual problems? [Clinicians' Forum] (September/October), 29

Shared Medical Appointments

The role of shared medical appointments for midlife women (July/August), 8

"STAT Check"

Women and Exercise (May/June), 35

Incontinence (September/October), 40

Systemic Lupus Erythematosus

Menopause management in women with systemic lupus erythematosus (September/October), 21

Testosterone Therapy

Position Statement, Part 2. The role of testosterone therapy in postmenopausal women: Position Statement of The North American Menopause Society (January/February), 18

The North American Menopause Society (NAMS)

"NAMS News" (March/April), 31 (May/June), 32 (July/August), 37 (September/October), 38 (November/December), 32

Position Statement, Part 2. The role of testosterone therapy in postmenopausal women: position statement of The North American Menopause Society (January/February), 18
